What is Moxsend?

Moxsend is a multi-tenant outbound email platform for teams that need structured outbound operations, shared controls, and reliable email workflow management. It combines campaign creation, AI generation, team governance, inbox management, and credit billing in a single cohesive platform built for GCC and India enterprise.

01	Identity & Access Layer Authentication, membership, invites, roles, workspace context, privacy-aware field controls
02	Marketing Execution Layer Leads, campaigns, follow-ups, templates, senders, inbox, deliverability, AI generation
03	Tracking & Data Layer Recipient tracking, lead activities, messages, suppressions, analytics, A/B results
04	Billing & Commercial Layer Wallets, credits, payments, subscriptions, invoices — Razorpay, USD and INR support
05	Operations Layer Module provisioning, system utilities, cron jobs, admin workflows, repair logic

Who is it built for?

- Sales teams** — Structured cold outreach across multiple senders and campaigns
- Agencies** — Client workspaces with isolated billing, roles, and data policies
- GCC enterprise** — UAE, Saudi Arabia, Qatar, Bahrain — GCC calendar, Arabic RTL, compliance-aware
- Indian B2B teams** — INR billing, India-timezone sending, local SaaS pricing via Razorpay
- SaaS companies** — Multi-tenant deployment with white-label and on-premise options

Campaign, Follow-Up & AI Features

Every capability documented for sales, technical, and procurement teams.

CAMPAIGN EXECUTION	
Draft & Send Workflows	Create, review, and launch campaigns with optional approval flows
Scheduled Sending	Timezone-aware send windows with day-of-week restrictions
Per-Campaign Delay Controls	Fine-tune sending intervals and rate limits per campaign
Previous Campaign Targeting	Target or exclude recipients from any prior campaign
Pause / Retry / Resume	Full campaign state management including immediate retry-now
A/B Testing	Subject line and body variant testing with per-recipient tracking
Credit Reservation	Credits locked before launch, released automatically on cancellation
Open / Click / Reply Tracking	Pixel and link tracking with real-time per-recipient state
Campaign Export	Export recipient delivery states and engagement data as CSV
FOLLOW-UP AUTOMATION	
Multi-Step Sequences	Unlimited follow-up steps per campaign with ordering controls
Fixed & Relative Scheduling	Send on a fixed date or N days after the original send
Conditional Sending Rules	Send if no reply, if no open, or if no click — per step
A/B Testing per Follow-Up	Test different follow-up content variants independently
Template Follow-Up Definitions	Define sequences at template level — auto-apply on use
Per-Step Statistics	Individual open, click, and reply rates per sequence step
AI EMAIL GENERATION	
Subject Line Generation	AI generates multiple subject variants with deliverability focus
Full Email Body Generation	Audience-aware, region-aware, offering-aware email writing via Groq
Subject & Body Rewrite	One-click rewrite of existing drafts with tone preservation
Guided Prompt Inputs	Audience, region, designation, and offering fields direct the AI
Follow-Up Generation	Sequence-aware AI writes follow-ups with context of prior email
HTML Formatting Enforcement	AI output enforces list markup and deliverability-safe HTML

Leads, Templates, Deliverability & Team

LEAD & PROSPECT MANAGEMENT

CSV Upload & Batch Import	Import thousands of leads in one file with validation
Lead Assignment & Sharing	Assign leads to teammates or share across workspace members
Custom Filters & Bulk Actions	Advanced filtering with bulk edit, delete, and role-aware export
Activity History per Lead	Full timeline of sends, opens, clicks, and replies per contact
Message History per Lead	Threaded inbound/outbound conversation view per prospect
Subscription Preference Flags	Per-lead unsubscribe state and preference management
Field-Level Privacy Controls	Admins can mask email, phone, and custom fields from lower roles
Lead Export Restrictions	Role-based control over who can export prospect records

TEMPLATES & BRANDING

Reusable Templates	Save and reuse campaign content across the team and workspaces
Template Folders	Organise by category, client, or campaign type
Template Version History	Track every change to a template with full revision log
Brand Fields	Embed brand name, logo, address, privacy policy, and unsubscribe label
Header & Footer Content	Consistent branded wrappers across all campaigns from this template
Team Scope Access Control	Restrict template visibility to specific roles or members

SENDER IDENTITY & DELIVERABILITY

SMTP / Google / Microsoft / SES	Connect any provider with OAuth or SMTP credentials
Custom Tracking Domains	Per-sender custom domains for click and open tracking
DNS Health Display	SPF, DKIM, DMARC status shown inside the platform
Cloudflare Integration	Custom hostname management for tracking domains via Cloudflare API
Blacklist Monitoring	Domain-level blacklist checks and alerts
Suppression List Management	Manual, bounce, unsubscribe, and policy-based suppressions
Sender Sharing & Assignment	Share sending identities across team members with controls

INBOX & REPLY MANAGEMENT

IMAP Reply Sync	Polls inboxes on schedule and syncs real replies into the platform
-----------------	--

Threaded Conversation View	Full inbound/outbound message thread per lead in one view
Message Deduplication	Prevents duplicate messages from appearing in timelines
Manual Reply from Platform	Reply directly from the Moxsend inbox without switching tools
Background Reply Polling	Cron-driven automatic reply syncing at configurable intervals
TEAM, BILLING & ARCHITECTURE	
Workspace Roles (Admin/Mgr/Member)	Granular permission policies per role across all features
Campaign Approval Workflow	Members draft, managers or admins approve before launch
Invite-Based Onboarding	Email invites with role pre-assignment and audit trail
Workspace Audit Logging	Full activity log for compliance and internal governance
Credit Wallet & Ledger	Per-workspace wallets with top-up, reservation, and consumption
INR + USD Billing via Razorpay	Local Indian payment support alongside international USD flows
Multi-Tenant Architecture	Organisation › Tenant › Workspace hierarchy with full isolation

Core Features vs. Major Competitors

Moxsend compared against Instantly.ai, Smartlead, Woodpecker, and Lemlist across the core features every cold email platform claims to support.

Per-campaign credit reservation	✓	✗	✗	✗	✗
GCC national holiday calendar	✓	✗	✗	✗	✗
Friday prayer window pause	✓	✗	✗	✗	✗
Ramadan-aware sending hours	✓	✗	✗	✗	✗
Arabic RTL interface toggle	✓	✗	✗	✗	✗
UAE / Saudi compliance posture	✓	✗	✗	✗	✗
White-label deployment	✓	✗	✗	✗	✗
Private cloud (customer AWS/GCP)	✓	✗	✗	✗	✗
On-premise deployment	✓	✗	✗	✗	✗

GCC features: Friday prayer pauses (12–2 PM), Ramadan 6h day (KSA/UAE), 15 national holidays across UAE, Saudi Arabia, Bahrain, Qatar, Kuwait.

Five Advantages No Competitor Can Replicate

01

GCC-First by Design

No Western cold email platform was built for the Gulf. Moxsend ships with Friday prayer window pauses, Ramadan working hour awareness, GCC national holiday calendars across UAE, Saudi Arabia, Qatar, Bahrain, and Kuwait, and a full Arabic RTL interface toggle. This is in the core sending engine — not a localisation add-on.

02

The Deepest Team Permission Model in the Market

Per-field privacy masking, campaign approval workflows, export restrictions by role, and manager-to-member reporting relationships. No competitor offers this governance depth. Most offer a binary admin/member model. Moxsend offers enterprise access control.

03

Multi-Tenant Architecture Built for Agencies

The Organisation › Tenant › Workspace hierarchy means agencies run hundreds of client accounts in full isolation — separate billing, senders, and data policies per client. Competing tools treat sub-accounts as an afterthought. Moxsend is multi-tenant from the database layer up.

04

Credit-Based Billing That Scales Both Ways

The credit wallet model supports monthly subscriptions, lifetime credit packs, per-campaign reservation, rollover on renewal, and both INR and USD payment flows. Competitors charge per inbox or per volume. Moxsend gives complete credit transparency at all times.

05

Three Deployment Options Including On-Premise

Moxsend deploys on Moxsuite cloud (UAE/India regions), on the customer's own cloud (AWS, Azure, GCP), or fully on-premise with source licence. This wins GCC bank, government, and healthcare deals — when data never leaves the building, the compliance conversation changes entirely.

PRICING

Simple, Transparent Pricing

No per-seat charges. No hidden add-ons. Credits work across Moxsend, Moxcheck, and Moxwarm. Credits roll on renewal for Growth and Scale. Free trial: 300 credits, no card required.

	Starter	Growth Most popular	Scale	Enterprise
Monthly price	\$49/mo	\$99/mo	\$149/mo	Contact us
Annual (save 20%)	\$39/mo	\$79/mo	\$119/mo	Custom
Credits / month	3,000	8,000	20,000	Unlimited*
Moxcheck verifications	1,000	5,000	20,000	Unlimited*
Domain warmup	1 domain	3 domains	Unlimited	Unlimited
AI features	Basic	Full suite	Full + priority	Full + priority
Credit rollover	✗	✓ on renewal	✓ on renewal	N/A
API access	✗	✗	✓	✓
Free trial	300 credits	300 credits	300 credits	Demo call
Deployment	Cloud	Cloud	Cloud	Cloud/Private/On-Prem

* Enterprise unlimited credits subject to Fair Usage Policy (500,000 emails/month). Lifetime credit packs available inside the app after 14 days. Standalone Moxcheck and Moxwarm plans also available.
